- ✓ Honest and reliable business behavior

Core values

- ✓ Collaboration and Partnership
- ✓ Customer Centric
- ✓ Ethics and Integrity

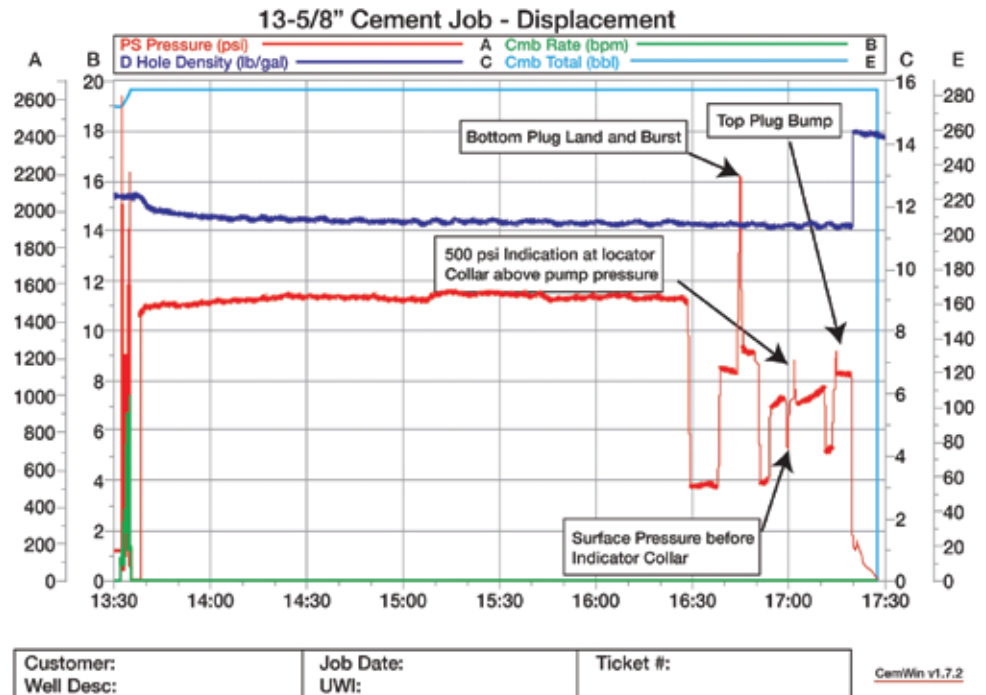

- ✓ Innovation and Technology
- ✓ High quality products and services
- ✓ People and Environment Sustainability
- ✓ Positive minds, assuring best services

1. WELL CONSTRUCTION/INTERVENTION SERVICES

Well construction brings workflows together to seamlessly bridge the gap between drilling and completions whether in Oil, Gas or even geothermal wells. We put the right information in the right hands at the right time so we can deliver a smart drilling program that maximizes accuracy, efficiency, and value—while also minimizing risks. Our range of services include but not limited to the list hereunder:-

- ✓ Matrix Stimulation
- ✓ Wellbore Cleanout
- ✓ Real-time Logging
- ✓ Perforating
- ✓ Nitrogen Kickoff
- ✓ Sand Control
- ✓ Milling
- ✓ Cementing
- ✓ Circulation
- ✓ Mechanical Isolation
- ✓ Fishing
- ✓ Wireline Conveyance

Features and benefits that we offer to our clients:

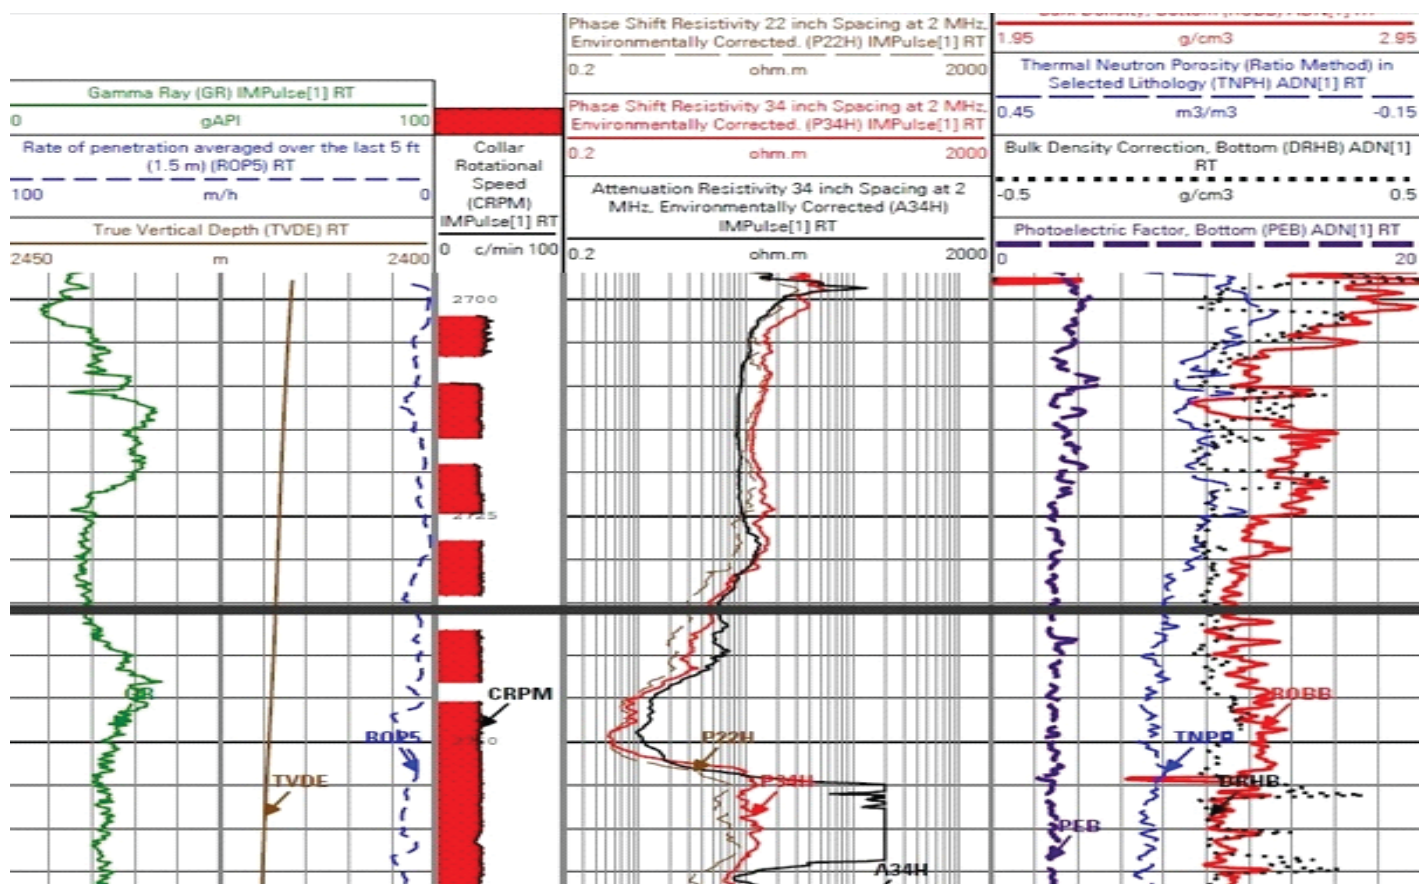

- ✓ Boost well performance and production rates
- ✓ Minimize health, safety, and environmental risks
- ✓ Significantly lower non-productive time
- ✓ Increase reservoir connectivity
- ✓ Improve hydrocarbon recovery
- ✓ Raise return on investment and reduce capital expenses

2. WIRELINE/SLICKLINE CONSULTATION SERVICES

Our Wireline Team focuses on providing expert solutions for the various challenges our clients may face during project developments. By working collaboratively with our clients to thoroughly understand their needs and objectives, our technical experts are able to consult on designing effective logging programs and provide holistic answers to complex problems.

Hereunder are among services that we provide to our esteemed clients:-

- ✓ Providing expertise and experience in the field of Wireline data acquisition in all fields including geology, petrophysical and reservoir.
- ✓ Acquisition & conveyance planning.
- ✓ Contract management ensuring better control of costs. Invoice audit and contract renegotiation.
- ✓ Technical operational audits removing setbacks from last minute surprises.
- ✓ Wellsite operations QC, assuring efficiency in execution and data quality.

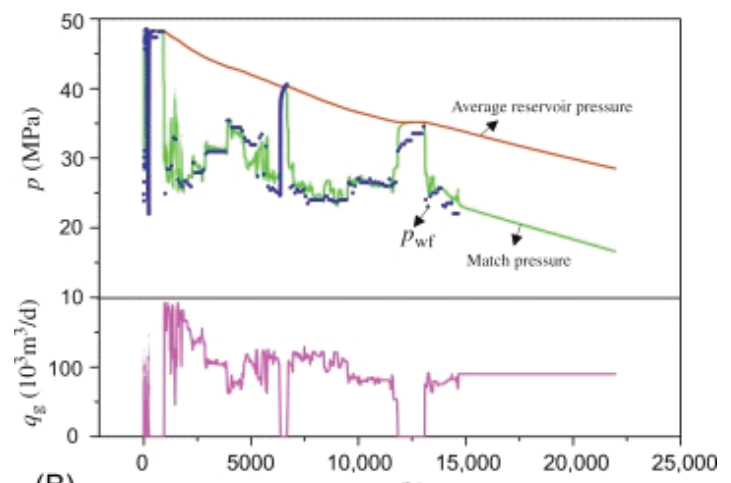

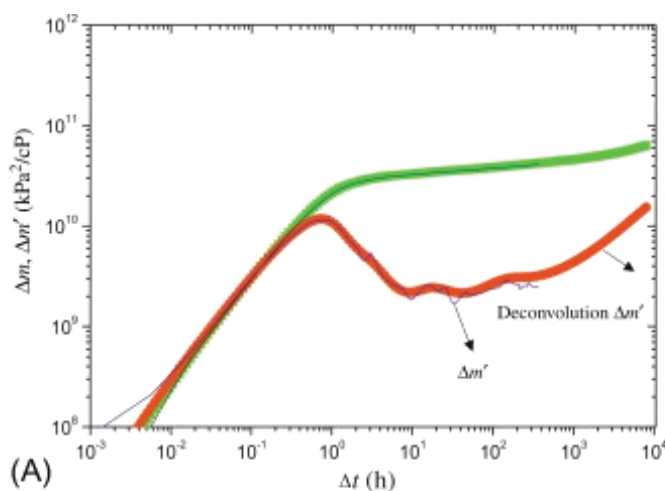

3. WELL TESTING AND FLOW MEASUREMENTS CONSULTATION SERVICES

We provide consultation solutions to help clients optimize the performance of existing producing assets while minimizing environmental impact.

These services include,

- ✓ Well clean up and unloading.
- ✓ Flow measurements.
- ✓ Production testing.
- ✓ Flowback and green flaring

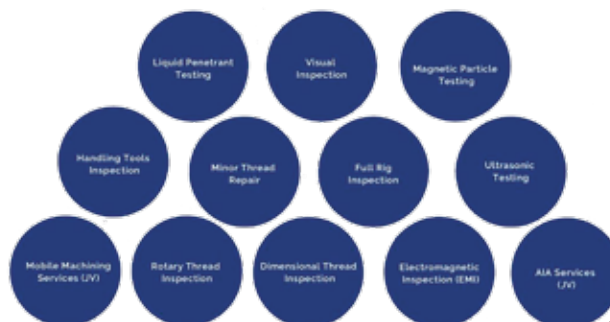

The proposed solutions are tailored to be different from existing providers, by optimizing resources, and deployment, making a big impact on overall operations timing and cost impact.

4. NDT INSPECTION

At ECOFIELD, we are passionate about providing bespoke solutions for our clients during challenging phases of their projects. Our teams of technical experts work collaboratively with clients to thoroughly understand their key objectives and design effective inspection programs.

Our Inspection (NDT) services include but not limited to below:-

5. WASTE MANAGEMENT

ECOFIELD is a leading provider of comprehensive waste management, offering services such as:-
